## Error with kwick vertslidemej10X

Posted by Charles - 2008/05/16 10:35

---

I just installed kwick vertslidemej10X. but there is an error :

Warning: modoutput\_rouned(Z:/www/test/modules/mod\_kwickverti\_slidingmenu.php) : failed to open stream: No such file or directory in Z:\www\test\includes\frontend.html.php on line 397

what could this mean, what is the problem and how do i get it rectified.

Thanks

Can we know what machine do you use to install this module? (About the Operating System, the browser and the web server), because I try in my localhost (I'm using Windows with Xampp Server and Mozilla Firefox browser) and there is look fine and no error found.

I think the error is the function modoutput\_rouned(Z:/www/test/modules/mod\_kwickverti\_slidingmenu.php) cannot find the required file (either the file is missing or the server cannot read the file)

Hello Charles,

i'm agree with dennysp,

just for addition, what about if you try to download again the installer? i think that there is any trouble (maybe not complete or error files) with your older

Regards
