
Super carousel and ie7 :(

Posted by Simon - 2008/06/30 06:24

Hi all,

I am using super carousel and all is really good in firefox.

However IE7 does not display this mod too well and I am at a loss to fix the issue. I end up with a lot of white space under the banners.

Live site: www.freewheelshop.co.uk

Site is still a work in progress.

dude, that problem is not with the module but with your template "yoo_ambient"
try to set the module class suffix to: `_menu`
that would probably do the trick

topmenu: last tabs are all red, you can change this in the topmenu module by adding items
