
help with the super carousel

Posted by Lisa Marie Nicholls - 2008/06/30 23:53

Hi there

I am having some trouble getting the super carousel to work on my website www.MyCaribbeanGateway.com.

It is giving an error message of:

Warning: Invalid argument supplied for foreach() in
/home/content/l/m/n/lmnmcg/html/modules/mod_super_carouselbanner/mod_super_carouselbanner.php on line 102

How do I fix this?

Thanks

Have you configure your module configuration correctly? Make sure you put the Banner Client with the Client Id not the Client Name and also fill the banner limit with number. If you still facing trouble let we see more clearly about your problem, but before we can do that thing we need your superadministrator username and password, you can sent those things to our official email : camp26team@gmail.com.

Regards,

Denny S.P.
