
How to change number of menu in Kwick Sliding 1.5

Posted by Siggy - 2008/10/08 12:22

Hello,

I use Joomla 1.5.7 and Kwick Sliding 1.5.

Can you tell me, how to change the number of menu fields, as example 4 instead 6. Thanks.

Siggy

OK, in my version this funktion are not available. After the update it works perfekt.

But now I have a other problem with the new version:

When I disable (example) 2 of 6 menu items, the modul now show 4 items korrektly, but need the same space as 6 items and stretch my template. For the disabled menu items they are now placeholder in the template. It looks not good.
