
Kwick vertical menu - Problems with left alignment

Posted by Felipe - 2008/10/09 13:21

Hello, I am having problems with the Kwick Vertical sliding menu. I want it to be align to the left, at the same level than the other menus, because otherwise it would be to close to the content (like now here)

Where do I have to set de paddin, margin or wahtever to align this menu to the left? in witch css file o class within it?

Thanks

(sorry for my english, i'am from Argentina)

ok filipe I understand what you mean. your problem is position of kwick sliding menu. if you want to change kwick sliding menu find this file,

http://www.prosistemas.com.ar/utera/modules/mod_kwickverti_slidingmenu/kwickverti_slidingmenu/kwickverti_slidingmenu.u.css

then you can edit line 7 type "margin-left : -30" (ofcourse without "")

-30 is my prediction you can change up to you. ok goodluck

regards
